

STRUCT - Operation Pompeii Situation Brief

L7

Morph key

struct = build / put together

re- = again / back

-ion = action / result

Time split above Vesuvius. Bright colours tore across the sky and ash drifted like static electricity. Our Bureau scanners spiked, reading the signals. This isn't a natural event; it's the Erasure, folding one hour into the next.

Quick glossary

Erasure = the time fault we're tracking

civilians = people who are not officials or agents

distorting = twisting changing

static = crackling dust-like specks in the air

Trainee agents, your first order is simple: map a safe line through the city and help us **restructure** the route for civilians. Log any signs of **destruction**. Move fast, speak clearly, and stay alert. The past is slipping, time is distorting, and we need you to hold the way.

Tasks

Underline the two **struct** words.

Finish

the sentence:
We must **restructure** the route so ...

Circle

one clue that proves the event is happening now.

Radio

order: Write one clear instruction using a **struct** word.
